RE: IMPORTANT NOTICE

Dear

Towers Perrin, United Technologies Corporation's pension plan consultant, notified us that a laptop containing UTC employee information was stolen from their New York City office. To perform its services, Towers Perrin refers to personal data, including your name, social security number and date of birth, which were stored on the stolen laptop. Towers Perrin promptly reported the theft to the local law enforcement authorities, who requested that we delay this notification until January 2007 to avoid any possible impediment to their investigation. Towers Perrin is carefully reviewing this incident and is working with us to take measures to prevent a recurrence.

We take our obligation to safeguard employees' information very seriously. We firmly believe our suppliers are equally obligated to do so, and we are therefore reviewing the security procedures of all suppliers that have access to or store UTC employee information.

At this point, we have no indication of any data being misused and we truly regret any inconvenience that this incident may cause you. UTC and Towers Perrin are committed to assisting you. On the reverse of this letter is a description of resources that are available to you free of charge for monitoring and reviewing your credit records. If you have any questions or need additional information, please contact the following toll-free number (800) 788-2795.

Sincerely,

A handwritten signature in cursive script that reads "William L. Bucknall".

William L. Bucknall
Senior Vice President,
Human Resources and Organization

Precautions You Can Take

Towers Perrin has arranged for you to enroll, at your option, in the Equifax Credit Watch™ Gold with 3-in-1 credit monitoring product at no cost to you for two years. This service provides you with an early warning system for changes to your credit file and will help you to understand the content of your credit file at the three credit reporting agencies. To initiate this service, please go to Equifax's website at www.myservices.equifax.com/tri and complete the enrollment process. During the "check out" process, provide the following promotional code: **CODE** in the "Enter Promotion Code" box. Alternately, you may enroll in the U.S. Mail version of the product by completing and sending the enclosed form by mail or via fax to Equifax at the phone number or address shown on the form.

Once you have enrolled, the Equifax Credit Watch™ Gold with 3-in-1 credit monitoring product will provide you with several valuable services including:

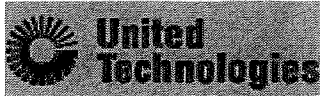

- Credit file monitoring of your Equifax, Experian, and TransUnion credit reports;
- Automatic notification of key changes to your credit files from any of the three agencies;
- Free 3-in-1 Credit Report and unlimited Equifax Credit Reports™;
- For those residing outside New York, \$20,000 in identity theft protection with \$0 deductible (subject to the terms, limitations and exclusions of the policy)[†]; and
- 24 by 7 live agent customer service to assist you in understanding the content of your Equifax credit information, to provide personalized identity theft victim assistance and to help you initiate an investigation of inaccurate information.

You may also separately consider placing an initial fraud alert on your credit file, which stays on your credit report for 90 days and which also entitles you to a free credit report from each reporting bureau. You can do so by contacting one of the three following credit reporting agencies:

- Equifax: 877-478-7625 www.equifax.com; PO Box 740241, Atlanta GA 30374-0241
- Experian: 888-397-3742 www.experian.com; PO Box 9532, Allen TX 75013
- TransUnion: 800-680-7289 www.transunion.com; Fraud Victim Assistance Division, PO Box 6790, Fullerton CA 92834-6790

Once you receive your reports, we urge you to review them carefully. Verify the accuracy of your Social Security number, address(es), complete name and employer(s) and other information. Notify the credit bureaus if any information is incorrect. You should also be vigilant in monitoring your accounts for suspicious activity. Be sure to report suspected identity theft to the credit bureaus, to the company maintaining any compromised account, and to the proper authorities. To learn more about how to protect yourself from identity theft, please visit www.consumer.gov/idtheft or call the Federal Trade Commission hotline phone number: 1-877-IDTHEFT (438-4338).

[†] Identity Fraud Expense Reimbursement Master Policy underwritten by Travelers Casualty and Surety Company of America and its property casualty affiliates, Hartford, CT 06183. Coverage for all claims or losses depends on actual policy provisions. Availability of coverage can depend on our underwriting qualifications and state regulations. Coverage not available for residents of New York.
Equifax's credit monitoring products are protected by US Patent 7,208,052

Outsourcing Services

Cambrex provides process development, optimization, scale-up and cGMP manufacturing services to companies that elect to outsource the manufacture of their active pharmaceutical ingredients (APIs), advanced intermediates, biologic drug substances and cell therapies. These services are furnished for the production of APIs and intermediates for use in traditional drugs (i.e. made using organic chemistry techniques) with specific expertise in handling high potency, cytotoxic, high energy and controlled substance compounds.

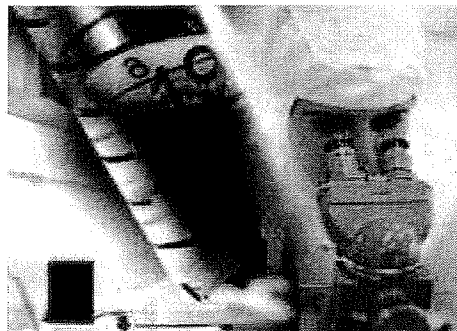

We offer comprehensive biopharmaceutical development and cGMP manufacturing services for the production of bulk biologic drug substances from strain and process development through Phase III clinical and commercial production using both fermentation and mammalian cell culture techniques.

With expertise in cell therapeutics, Cambrex has complete development and manufacturing services available to cell therapy companies. Our offerings lead the industry with tissue acquisition, process development and media optimization, regulatory support, filing assistance, distribution, logistics and sales and marketing services in the United States and Europe.

Serum and Custom Media are available in flexible packaging formats for use in the manufacture of biologics and cell therapies including production of monoclonal antibodies, viral antigens and recombinant proteins using a variety of mammalian and invertebrate cell lines.

For generic drug companies, Cambrex supplies almost one hundred APIs. Cambrex manufactures these products using complex chemistry and technical expertise while maintaining its long-standing reputation of quality and reliability. We work with generic drug companies well in advance of drug patent expiration, provide a non-infringing process and file a Drug Master File (DMF) for the generic active pharmaceutical ingredients.

Drug Discovery Research

Cambrex supplies innovative molecular biology, cell biology and bioassay products and services for the discovery, screening and ADMET (absorption, distribution, metabolism, excretion and toxicity) testing of new drugs. Products include Primary Cell and Media Systems, Differentiating Cell Systems, Conditionally immortalized cell lines and Cell Culture (Specialty Media, Classical Media, Cell Culture reagents, Animal and Human Sera). Cell based assays are used to perform in vitro toxicology

or drug discovery research.

Molecular biology products are essential tools for DNA, RNA and protein separation and DNA sequencing. Products include tools for Nucleic Acid Electrophoresis, Protein Electrophoresis, Sequencing and Mutation Detection and Other Electrophoresis products.

Therapeutic Testing Market

Rapid microbial detection products are used for fast, accurate testing of pharmaceuticals, agriculture products, food and cosmetics. Endotoxin detection reagents, kits, software and equipment are used by quality assurance departments in pharmaceutical and biotechnology companies to detect endotoxin. Endotoxin detection is required by the FDA to test for the harmful presence of bacteria in human and veterinary drugs, biologics, implantable medical devices, and water for injection systems.

Cambrex offers a full range of testing services for biologics and cell therapeutics.

Supported by Facilities Around the World

Our subsidiaries support the entire drug development cycle from cell biology research through the production of licensed active pharmaceutical ingredients to commercialization.

Cambrex has R & D and manufacturing facilities in the US and Europe and expertise in biological, chemical and cell-based technologies.
